

TWC DIY MEASURING PROCEDURE

Step 1: Identify your kitchen shape you have or want below:

Step 2: Using a tape measure, measure and write down the distance as outline below:

- A** – Measure the ceiling height from the floor.
- B & C** – Measure the overall length of each wall.
- D** – Measure the size of doors and windows (including the trim).
- E** – Measure the distance from the edge of a wall to the edge of the window trim.
- F** – Measure the exact distance from the edge of a wall to the location of the water drain line.
- G** – Measure the exact distance from the edge of a wall to the gas lines and/or the electrical outlet for the stove.
- ★ Tell us the size and type if you want to have an additional island.

Step 3: Please identify the type and size of your appliance you want or currently have:

Item	Type	Size W x D x H
Sink		
Dishwasher		
Range		
Hood		
Refrigerator
